### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Clarke et al.

The reasons for this rejection are set forth in the last Office action.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
5. Claims 4-6 and 10-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clarke et al.

The reasons for this rejection are set forth in the last Office action.

***Response to Arguments***

Art Unit: 1743

6. Applicant's arguments filed 04-14-04 have been fully considered but they are not persuasive. Applicant argues that the method and device of Clarke et al operated by measuring an analyte induced pyro-electric effect, whereas the instant invention measures a photo-ionization event through either isometric change or the ejection of electrons, protons or OH- ions. However, applicant's characterization of the instant invention is not commensurate with the claims. Specifically, the claims require only the measurement of analyte responsive "photo-induced charge movements" (claims 1, 10 and 17). Since the pyroelectric response measured in Clarke et al would have constituted a photo-induced charge movement, this claim limitation is met. Similarly, applicant's characterization of the claimed method as requiring a sensor which is "ordered electrode/film/dye/analyte/electrode" is not commensurate with the language of the claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey R. Snay whose telephone number is (571) 272-1264. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill A. Warden can be reached on (571) 272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
